Version 4 /EN

Revision date: 15.07.2025

Respiratory protection	Under anticipated exposure conditions, no personal respiratory equipment is required. Respiratory protection should be worn for short-term exposures to avoid any secondary risks, after all measures to reduce exposure at source have been taken, e.g. isolation and/or exhaust ventilation. Always follow the manufacturer's instructions for use and maintenance of respiratory equipment. A particulate filter mask (protection factor 20) conforming to EN149FFP3 or EN140P3 or equivalent should be worn.
Hand protection	Suitable gloves, chemically resistant (EN 374) and resistant to prolonged contact (Recommended: protection index 6, corresponding to > 480 minutes breakthrough time, according to EN 374): e.g. nitrile rubber (0.4 mm), chloroprene rubber (0.5 mm), butyl rubber (0.7 mm) and others.
Eye protection	Safety glasses with side shields (EN 166)
Skin and body protection	Body protection must be chosen according to the activity and possible exposure. For example: apron, safety boots, protective overalls (according to EN 14605 for splashes or EN ISO 13982 for dust).
Hygiene measures	Remove and wash contaminated clothing and gloves, including the inside, before reuse. Wash hands before breaks and immediately after handling the product. Do not eat, drink or smoke when using.
Protective measures:	Long-sleeved work clothing is recommended. Store work clothing separately. Keep away from food, drink and animal feeding stuffs.
