

TERRA CLEAN

Contain:Bacillus thuringiensis 2x10⁸cfu/ml, Bacillus subtilis 2x10⁸, Trichoderma asperellum 0.5x10⁴cfu/ml, vegetable oil (glycerol-inert material) 3%

Fertilizer - soil improver

Formulation:suspension

Product suitable for use in organic farming according to Regulation (EU) 848/2018

Hazard phrases

Not applicable.

Precautionary phrases

P501 – Dispose of contents/container in accordance with national/international regulations.

it is IT

Lot no.:see above

Date of manufacture:see above

Expiration date:24 months

Storage:Store in a dry, cool and well-ventilated place..Storage temperature 5°C-25°C.

Careful:Read the attached instructions before use.

Producer:Norofert SA

LT. Av. Serban Petrescu Street, No. 20, Sector 1,

Bucharest, Romania

Phone: 0766 080 767

For your attention:

Shake the container vigorously for 15-20 seconds for good homogenization. Following the instructions presented, the product can be used for its intended purpose.

The manufacturer declines all responsibility for damages due to storage, handling or use not in accordance with the recommendations on this label.

TERRA CLEAN

Mode of action:

The use of *B. Thuringiensis* increases the solubility of phosphorus in the soil. Beneficial effect as a biofertilizer and plant growth promoter (PGP). The presence of *B. thuringiensis* in the rhizosphere of plants gives positive effects on crop establishment. Promotes growth, tolerance to drought stress and increases nutrient uptake and utilization. *Bacillus subtilis* plays a crucial role in the soil by promoting plant growth, improving soil health and protecting plants against stress. *Trichoderma asperellum* in the soil mainly functions as a beneficial organism that stimulates growth and improves soil health and nutrient availability and uptake and stimulates plant growth by producing hormones.

How to use:

Culture	Dose
Sunflower	1 l/ha
Winter wheat	1 l/ha
Autumn rapeseed	1 l/ha
Maize	1 l/ha
SOYBEAN	1 l/ha

Application time:

It will be applied either before stubble removal or when preparing the seedbed with 8-10 cm incorporation, immediately after application, to field crops.

It is recommended to apply in a package with the products Country 600, N-Bacter and P-Fix.

Preparation of the solution:

Fill the sprayer tank halfway, add the appropriate amount of product, and then top up with water. Stir the spray solution well during filling and application. Use clean water from a known source.

Application technique:

Ground equipment can be used for field application of the products, commonly used on the above-mentioned crops. The volume of solution used depends on the equipment used. It is recommended to use a solution volume of 200-400 l/ha, so that there is good coverage of the soil and plant residues.

The solution will be applied immediately after mixing.

Application recommendations:

Do not store the prepared solution overnight. Avoid applying in the middle of the day when temperatures exceed 25°C. If rain occurs shortly after application, it will be necessary to repeat the treatment. Do not apply when wind speed favors drift beyond the area intended for treatment.

Compatibility: Mixing with other products should be avoided to prevent inactivation of microorganisms.

Break time: 0 days

Cleaning the equipment: Equipment will be pressure washed before and after application, and particularly if a product that could damage the subsequent crop was used before Terra Clean.
