The above budget mainly considers the sales of products from Norofert's own production line (Organics, Karisma and Fitofarma range) as well as the goods included in the product packages for organic or conventional agriculture.

We mention that in the BVC for 2021 was not included at all the cereal trading activity, as its forecast is inaccurate due to the unpredictable status of cereal prices at this time of year.

The above budget also considers the Agroprod Cev SRL farm, with 1000 ha in Zimnicea, Teleorman County, as well as the agricultural works, fertilization and seeds for the autumn 2021 campaign, in which wheat and rapeseed crops will be planted in an ecological system (Conversion 1). It also includes financial expenses for the loan that will be contracted and directed to pay the Contract for the transfer of shares for the farm owned by Agroprod Cev SRL.

The company adjusted the budget in the context of the continuing pandemic risks caused by COVID-19 in Romania, in case of suspension of activity. The risk will disappear in the second part of the year under the conditions of the population's vaccination plan. This will be monitored, and action will be taken if necessary.

The company's management will take all necessary steps so that future investments do not affect the company's cash flow.
