## ARAMIS

Batch: ARMS Nr. 10112020INPTORG-ARMS-ANXI  
Issued by: NOROFERT S.A.

*We hereby, NOROFERT S.A., CIF RO12972762, with registred office in 26 Petrache Poenaru Street, sector 5 Bucharest, states the following:*

*The product **ARAMIS** contains NON-GMO active substances permitted for use in organic farming, in accordance with Reg. (EC) 889/2008 implementing Reg. (EC) 834/2007, Annexes I and II, as follows:*

**Declared active substances:**

- 10% vegetal amino acids
- $1 \times 10^7$  cfu /ml Trichoderma Harzianum spp.
- $1 \times 10^7$  cfu /ml Trichoderma Viride

The statement is valid in accordance with Regulation (EC) 834/2007 throughout its period of validity, with precise reference to the restrictions and permissions specified in Annexes I and II, integral parts thereof Reg. (EC) 834/2007.

## 1. Product content / compliance

- 10% vegetal amino acids
- $1 \times 10^7$  cfu /ml Trichoderma Harzianum spp.
- $1 \times 10^7$  cfu /ml Trichoderma Viride

## 2. Physical/chemical properties

**ARAMIS** comes in liquid form, has a brown color, with a specific smell.

## 3. Action mode / Description

**ARAMIS** is a biodynamic product, obtained by a process of rapid cold fermentation, and contains NON-GMO substances that complies with the requirements of Regulation 889/2008, Annexes I and II.

ARAMIS contains two types of fungal strains with a strong fungicide action (Trichoderma Harzianum spp. and Trichoderma Viride spp.), organic amino acids and a culture of elicitor-activating bacteria. It fights all types of diseases that can appear in orchards and fruit-bearing shrubs.

### **How ARAMIS works**

In ARAMIS, the two classes of fungi (Trichoderma Harzianum spp. and Trichoderma Viride spp.) were dosed in such manner that they ensure a fast and long-term effect on the organic crops. The combination of fungi in ARAMIS works in two ways:

- Invasive – by populating the plants with both types of fungi, so that the access of pathogens to plant stomata is almost entirely limited
- Curative – the two fungal strains rapidly degrade the cell walls of pathogens, quickly stopping their multiplication

## 4. Recommended dosage

From practical experience and / or available documentation, we recommend the following application dosage:

### TREES AND SHRUBS

1L / ha, in 200-400 liters of water
