1. Product content / compliance

- 10% vegetal amino acids
- 1×10^8 cfu /ml *Trichoderma Harzianum* spp.
- 1×10^8 cfu /ml *Trichoderma Viride*

2. Physical/chemical properties

ATHOS comes in liquid form, has a brown color, with a specific smell.

3. Action mode / Description

ATHOS is a biodynamic product, obtained by a process of rapid cold fermentation, and contains NON-GMO substances that complies with the requirements of Regulation 889/2008, Annexes I and II.

The efficiency of the fungicide **ATHOS** is increased due to organic amino acids, with a tonic and invigorating role for plants undergoing water or pathogenic stress, respectively due to the microorganisms with the role of activator of the helix (the helix is a molecule that activates the plant's immune system).

ATHOS, role of disease prevention and control

When used in a preventive manner, **ATHOS** successfully protects the agricultural crops, ensuring the plants a healthy development and decreases the risk of infestation with specific diseases. Correctly applied, the preventive treatment with **ATHOS** ensures protection against grain fusariosis, snow mold, brown rust, yellow rust, barley stripe (*pyrenophora gramineum*), net blotch (*pyrenophora teres*), barley and rye scald (*rhynchosporium secalis*), septoria, common bunt and flying smut.

Moreover, it is extremely efficient in protecting the fruit bearing trees and shrubs and vegetables, with a prevention and combating role, against apple scab, powdery mildew, monilial disease, brown rot of fruits, tomato blight, alternaria, grey mold, tomato leaf mould, fusarium, root rot (*phytophthora parasitica*), powdery mildew, damping off, didymella stem rot, bacteriosis, alternaria brassicae, clubroot, light leaf spot.

4. Recommended dosage

From practical experience and / or available documentation, we recommend the following application dosage:

WHEAT, BARLEY, TRITICALE, SPRING BARLEY, WHEAT DURUM

1L / ha, in 200-400 liters of water
