1. Product content / compliance

- 100% Soft phosphate rock (natural mineral source)

2. Physical/chemical properties

P35 BIO comes in shape of brown granules, without smell.

3. Action mode / Description

P35 BIO is a product made in accordance with Regulation 834/2007, Annexes I and II and Regulation 2003/2003.

Through its content, applied with the seed helps a healthy growth and development of the root system of plants.

From field experience, when applied at a dose of 150-200 kg / ha once with the seed, it increases productivity by increasing the number of absorbent hairs at the root of the plants, thus ensuring access to other nutrients in the soil and also providing the crop the required amount of phosphorus.

5. Recommended dosage

From practical experience and / or available documentation, we recommend the following application dosage:

LARGE CROPS / MISCELLANEOUS VEGETABLE CROPS

150-200 Kg / ha
