for the product

# TERMINATOR BT

Batch: TRMNBT Nr. 10112020INPTORG- TRMNBT-ANXI

Issued by: NOROFERT S.A.

*We hereby, NOROFERT S.A., CIF RO12972762, with registred office in 26 Petrache Poenaru Street, sector 5 Bucharest, states the following:*

*The product **TERMINATOR BT** contains NON-GMO active substances permitted for use in organic farming, in accordance with Reg. (EC) 889/2008 implementing Reg. (EC) 834/2007, Annexes I and II, as follows:*

**Declared active substances:**

- 1 x 10<sup>8</sup> cfu / ml Bacillus Thuringiensis

The statement is valid in accordance with Regulation (EC) 834/2007 throughout its period of validity, with precise reference to the restrictions and permissions specified in Annexes I and II, integral parts thereof Reg. (EC) 834/2007.

## TECHNICAL AND SAFETY DATA SHEET

# TERMINATOR BT

### Precautionary statements

P 101 – If medical advice is needed, keep the container or label of the product handy.

P 102 – Keep out of reach of children.

P 280 – Wear protective gloves / protective clothing / eye protection / face protection.

P 302 + P352 – In case of skin contact: wash thoroughly with water.

P 363 – Wash contaminated clothing before reuse.

P 501 – Dispose of contents / container to a hazardous waste disposal facility.

### Packing:

**e** x 1L,10L

## 1. Product content / compliance

- 1 x 10<sup>8</sup> cfu / ml Bacillus Thuringiensis

## 2. Physical/chemical properties

**TERMINATOR BT** comes in liquid form, has a brown color, with a specific smell.

## 3. Action mode / Description

**TERMINATOR BT** is a biodynamic product, obtained by a process of rapid cold fermentation of organic matter and its mixing with NON-GMO organic and mineral substances that complies with the requirements of Regulation 889/2008, Annexes I and II.

TERMINATOR BT offers the most efficient organic treatment against caterpillars and bugs. TERMINATOR BT is an insecticide based on Bacillus Thuringiensis – microorganism in stick form, sporogen, aerobe, positive gram, ubiquitin.

First used as a biological insecticide 21 years ago, Bacillus thuringiensis is found naturally in various environments, especially in soil and leaves. It is lethal to hundreds of thousands of disease-carrying insect species, but non-pathogenic to humans, birds and animals. It was found that the different strains of Bacillus thuringiensis show a certain specificity for caterpillars of the order Lepidoptera, respectively for flies and beetles of the orders Diptera and Coleoptera.

Specific mode of action: after ingestion of Bacillus Thuringiensis crystals, a chain of biochemical reactions (biochemical sequences) occurs in the intestines of insects, which depend on the specific binding of toxins to some molecules (receptors) in the wall of the insect's digestive tract. These toxin receptors are only found in the intestinal wall of insects.

## 4. Recommended dosage

From practical experience and / or available documentation, we recommend the following application dosage:

### ALL TYPES OF CROPS

1L – 2L / ha, in 200-400 liters of water
