

VERMICOMPOST

Contains : vermicompost 100 %

Organic fertilizer

Formulation : Compost

The product can be used in organic farming according to Regulation (EC) 848/2018

Hazard statements

Not applicable

Precautionary statements

P501 – Dispose of contents/container in accordance with national/international regulations .

e 1000 ml

Batch. no: See above

Date of manufacture : See above

Validity period : 24 months

Storage: Store in a dry, cool and well-ventilated place. Storage temperature 5⁰ C – 25⁰ C.

Attention: Read the instructions before use.

Manufacturer : Norofert SA

The street Lt. AV. Șerban Petrescu, No. 20, District 1,
Bucharest, Romania

Phone : 0766 080 767

For your attention: By observing the indications presented, the product can be used for its intended purpose. The manufacturer declines any responsibility for damages due to storage, handling or use not in accordance with the recommendations on this label.

Action Mode: it is obtained by the action of California red earthworms (earthworm humus), and contains elements necessary for plant development, beneficial microorganisms, humus and amino acids. It improves the structure of the soil, increasing its aeration and absorption of nitrogen from the atmosphere, thus helping plants to grow strong and healthy. It has a high proportion of all 16 nutrients that plants need.

Suppression of harmful soil fungi . Microorganisms produce hormones, vitamins, nutrients, enzymes, amino acids and minerals necessary even for young plants.

Application: to all crops in the garden, apartment, such as vegetables, flowers, fruit trees, ornamental plants. 1 teaspoon at the root when replanting small seedlings, or 1 teaspoon when planting seedlings, or 1 large teaspoon in pots (mix 1-2 cm with the superficial layer of soil in the pots). When planting shrubs (gooseberry, currant, raspberry, sea buckthorn, blueberry), 1.5 liters of vermicompost is introduced into each planting hole, mixed well with the base soil, irrigated and then planted. When planting fruit trees, in the planting pit, under each sapling (apple, pear, cherry, plum), introduce 1.5 - 2 liters of vermicompost, mix well with the base soil, irrigate and then plant.

Hygiene measures and work protection:

Avoid contact with skin, eyes and clothing. Use personal protective clothing. Do not eat, drink or smoke during use. Hands and/or face should be washed after use. Keep out of reach of children.

Environmental protection measures :

Do not discharge on the ground/basement. To prevent by any means that the product reaches the surface waters.

Storage and transport conditions :

It will be stored in a dry, cool and well-ventilated place. It shall be protected from direct sunlight and protected from frost. Keep container tightly closed. Storage temperature 5 °C – 25 °C.

Validity period: Two years from the date of manufacture.
