

ELIXIR

Contains: Amino acids of vegetable origin 2%, Boron ethanolamine 1%

BIOSTIMULATOR

Product for foliar application

Formulation: soluble concentrate

The product can be used in organic farming according to Regulation (EC) 848/2018

Hazard statements

Not applicable

Precautionary statements

P501 – Dispose of contents/container in accordance with national/international regulations

e 500 ml

Batch. no: See above

Date of manufacture : See above

Validity period : 24 months

Storage : Store in a dry, cool and well-ventilated place. Storage temperature 5⁰C - 25⁰C.

Attention : Read the accompanying instructions before use.

Manufacturer : Norofert SA

Street Lt. AV. Șerban Petrescu, No. 20, District 1,

Bucharest Romania

Phone : 0766 080 767

For your attention :

Shake your container vigorously for 15-20 seconds for good homogenization. By observing the indications presented, the product can be used for its intended purpose. The manufacturer declines any responsibility for damages due to storage, handling or use not in accordance with the recommendations on this label.

Action mode:

Biostimulator based on amino acids with a balanced content of microelements. Activates and intensifies physiological processes in plants throughout the growing season. Amino acids are able to directly or indirectly influence the physiological activity of plants, with a fundamental role in the synthesis process of chlorophyll, in the functioning of stomata. Stimulating role of growth, flowering and fruiting processes, but also with a natural chelating effect of microelements. Produces better plant vigor, greener and shinier leaves. Boron plays an important role in the movement and metabolism of plant sugars, in the formation of cell wall lignin, and in the synthesis of plant hormones and nucleic acids.

Application: can be applied to flowering plants in the garden and apartment.

Application time:

It is applied directly on the leaves throughout the vegetation period, the interval between treatments 3-5 days.

Application technique:

CAREFUL! YOU DO NOT HAVE TO DO A PLANT BATH! The product must be sprayed from a distance of 20 cm, enough for the particles to reach the surface of the leaves.

Hygiene measures and labor protect:

To avoid contact with the skin, the eyes and the clothing. Use protective clothing individual. You wear protective gloves, protective clothing. Do not eat, do not drink and don't smoke in the time the use. Hands and / or face must to be washed before breaks and at the end work schedule. Keep out of reach children and other people unauthorized.
